## Experience

**Full-Stack Developer**      Current from April 2017  
[NeuroDataLab](#)

Designed and developed a platform for emotions dataset production by annotating video fragments for money.

**Frontend Developer**      2016  
[UCHI.RU](#)

Developed a bunch of interactive lessons for children. Designed and developed a components documentation assembler.

**Project Manager**      2014–2015  
[Лекторий МФТИ](#)

Created and managed a working process for creating synopses of 400 educational video-lectures.

**Full-Stack Developer**      2010–2014  
*Freelance*

Developed four web-sites from scratch.

## Hobbies

I really love

- visualizing complex data programmatically,
- optimizing any working process,
- writing down my thoughts into GitHub repos,
- travelling around the world,
- reading awesome books.
