## Experience

**Full-Stack Developer** — Current, from April 2017
*NeuroDataLab*
Designed and developed a platform (emotionminer.com) for emotions dataset production by annotating video fragments for money. Now the platform is also used for recording emotions of the worker by his webcam.

**Frontend Developer** — 2016
*UCHi.RU*
Developed a bunch of interactive lessons for children. Designed and developed a components documentation assembler.

**Project Manager** — 2014-2015
*Лекторий МФТИ*
Created and managed a working process for creating synopses of 400 educational video-lectures.

**Full-Stack Developer** — 2010-2014
*Freelance*
Developed four web-apps from scratch.

## Hobbies

I really love
- systemizing & optimizing any working process,
- visualizing complex data programmatically,
- writing down my thoughts into notes and blogs,
- travelling around the world,
- reading awesome books,
- playing Sax.
